

Ghost Diving Poland

GUE PROJECT BRIEF - 2024

Svanhild - a wreck of a Danish cargo ship that sunk in 1944 is a very popular diving destination among recreational wreck divers in Poland.

Our volunteers regularly dive on this position to get rid of the old #ghostnets snagged on the structure of this wreck.

Our last mission was not an easy one - limited visibility, low temperature and waves severely hampered our efforts. Nevertheless, we managed to recover a sizeable portion of the old nets!

Svanhild is now almost completely cleaned.

Divers who took part in the mission:

- Bernabe Moreno
- Darek Lutkiewicz
- Andrew Piekarski
- Christopher Niecko
- Gregory Werstler
- Adam Jaworski
- Agnieszka Huszcza
- Catherine Principle-Power

STATUS: ACTIVE. Running on average one clean-up per month

HOW TO BE PART OF THIS PROJECT

- Contact: kontakt@ghostdiving.pl for more info

PARTNER

- This project couldn't take place without support of our partner - Healthy Seas (Foundation that takes care that the ghost nets that we recover are introduced in circular economy and re-used in a better way).
